

SPRING LIFTER

THE **SPRING LIFTER** IS A SELF-RAISING TABLE WHICH IS DESIGNED TO RAISE OR LOWER TO AN OPTIMUM WORKING HEIGHT.

TWO **SPRING LIFTERS** CAN BE SETUP SO WHEN TIMBER IS ADDED OR REMOVED FROM A PACK, THE **SPRING LIFTERS** WILL AUTOMATICALLY ADJUST THE HEIGHT. BY KEEPING THE TIMBER AT A CONSTANT ERGONOMIC WORKING HEIGHT, THE **SPRING LIFTER** WILL HELP REDUCE OPERATOR FATIGUE, BACK STRAIN, AND WILL IMPROVE EFFICIENCY. FOR LARGER PACKS, ADDITIONAL **SPRING LIFTERS** CAN BE USED, WHICH ADJUSTS THE RATE OF MOVEMENT.

ADVANTAGES:

- ECONOMICAL PRICE
- SOLID AND DURABLE DESIGN
- HELPS REDUCE OH&S ISSUES
- IMPROVED SAFETY AND PRODUCTIVITY
- FULLY MOBILE
- AUTOMATICALLY ADJUSTS HEIGHT.

YELLOW FOR HIGH VISIBILITY AND SAFETY

DURABLE CONSTRUCTION

HIGH QUALITY SPRING

HARDENED BUSHES FOR LONG LIFE

METAL ROLLERS

NOW WITH LOCKABLE SWIVEL CASTORS AVAILABLE

THE SPRING LIFTERS CAN BE ROLLED INTO POSITION BY ONE PERSON, OR FIXED IN POSITION FOR A MORE PERMANENT SOLUTION.

AS THE TIMBER IS UNLOADED, THE SPRING LIFTERS WILL RAISE THE PACK HEIGHT TO MAINTAIN A CONSTANT SAFE AND ERGONOMIC WORKING HEIGHT.

THE SPRING LIFTER RESEMBLES THE ACTION OF A SCISSOR LIFT TABLE WITH A SPRING TO MAINTAIN THE HEIGHT. AS THE WEIGHT (TIMBER) IS ADDED AND THE PACK HEIGHT INCREASES THE SPRING COMPRESSES, ALLOWING THE WORKING HEIGHT TO LOWER. THE MORE WEIGHT THAT IS ADDED, THE MORE THE SPRING COMPRESSES.

THE USE OF A SPRING MEANS THE OPERATOR NEVER HAS TO ADJUST ANYTHING. THE SPRING WILL AUTOMATICALLY MAINTAIN THE SAME HEIGHT.

THE LARGER THE PACKS OF TIMBER, THE MORE SPRING LIFTERS REQUIRED.

EVERY SPRING LIFTER COMES WITH LOCKABLE CASTOR WHEELS, FOR FULL MOBILITY.

SPECIFICATIONS

CAPACITY:	450KG
TABLE DIMENSIONS:	1100x400MM
EXTENDED HEIGHT:	830MM
COMPRESSED HEIGHT:	270MM
LIFTING CAPACITY:	350 OR 450KG

APPEARANCE AND SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE
